THE ABSORBENT THIN FOAM DRESSING WITH SAFETAC® TECHNOLOGY

- Minimizes pain and trauma at dressing changes\(^1,2\)
- Highly conformable even over difficult-to-dress areas

**Safetac® technology layer**
- Reduces pain and trauma during dressing change
- Does not adhere to the moist wound bed but to dry skin only
- Seals the wound margins and reduces risk of maceration

**Thin foam pad**
- Absorbs exudate
- May be used under compression
- Comfortable

**Polyurethane backing film**
- Moisture resistant
- High MVTR
- Bacterial and viral barrier\(^\dagger\)

---

*Safetac® technology: Less pain and less trauma.*

*Safetac* is a patented adhesive technology that minimizes pain to patients and trauma to wounds. Safetac technology is available exclusively on Mölnlycke Health Care dressings, including Mepilex® wound care dressings, Mepitel®, Mepiform® and Mepitac®.

For more information visit www.molnlycke.us
How to use Mepilex® Lite

Clean the wound in accordance with normal procedures. Dry the surrounding skin thoroughly. Cut for customization, if required. Remove the larger release film.

Apply the adherant side to the wound. Mepilex® Lite should overlap the dry surrounding skin by 2 cm. Remove the shorter release film and mold the dressing in place. Do not stretch the dressing.

Secure Mepilex® Lite with a bandage or other fixation, such as Mepitac® or Tubifast®.

How Mepilex® Lite works

Mepilex® Lite is a highly conformable dressing that absorbs exudate and maintains a moist wound environment. The Safetac® layer seals around the wound edges, preventing the exudate from leaking onto the surrounding skin, thus minimizing the risk of maceration. The Safetac® layer also ensures atraumatic dressing changes. Mepilex® Lite may be cut to suit various wound shapes and locations.

Benefits of Mepilex® Lite

• Atraumatic to the wound and surrounding skin on removal
• Promotes patient comfort during wear and minimizes pain upon removal
• Minimizes the risk of maceration
• Conforms well to body contours
• Thin and comfortable to wear
• Easy to handle; may be cut for customization
• Maintains a moist wound environment
• Bacterial and viral barrier†

Wear time: Up to 7 days

Areas of use

• Non to low exuding wounds
• Leg and foot ulcers
• Pressure ulcers
• Partial thickness burns
• Radiation skin reactions
• Epidermolysis Bullosa
• Under compression bandaging
• Peristomal irritation
• In combination with gels
• Protection of compromised and/or fragile skin

Note

In case of clinical signs of infection, consult a health care professional for adequate infection treatment.

Wear time: Up to 7 days
